## MESSAGE FROM EXECUTIVE DIRECTOR

### *Greetings from PANITA Secretariat*

PANITA since its inception has focused on contributing towards achieving adequate nutrition status for all Tanzanians; this is a noble cause but equally ambitious that requires competent and dedicated workforce, good leadership and governance structures, adequate resources as well as cohesive and capable members' base. All this being embroiled in the spirit of volunteerism, integrity and accountability. This report provides synopsis of the implemented activities and achievements in 2019 as guided by five years strategic plan 2015-2020.

Overall, there has been notable progress in the implementation of 2019 annual plan as approved by Annual General Meeting (AGM) and regularly supervised by the Board of Directors (BoD). Specifically the implemented activities includes but not limited to: governance and accountability in the nutrition sector at all levels e.g. Members of Parliament, Nutrition COMPACT review, engagement with Regional Consultative Council (RCC), Full Councils and Nutrition Steering Committees at all levels; advocacy for domestic resource mobilization; capacity building to members and key stakeholders such as: Regional Commissioners (RCs), Regional Administrative Secretary (RAS), Members of Parliaments, Media, etc. community engagement activities focusing on behavioral change towards good nutrition. Besides, Secretariat has been able to fulfil PANITA'S constitutional requirement whereby, Annual General Meeting (AGM) and Board of Directors (BOD) meetings were held as required.

On the other hand, despite the above good progress on the implementation of 2019 annual plan, this has not been without glitches; where there has not been sufficient resources to implement some of the PANITA's core mandates such as capacity building to members, zonal review meetings, monitoring visits etc. This is a result of lack of core funding as opposed to the project funds which are much restricted to specific activities and localities.

Generally, PANITA has substantially accomplished planned activities for 2019 as guided by Strategic plan 2015-2020. This has been possible as a results of dedicated, industrious, and competent secretariat staff augmented by committed leadership by the BOD and good collaboration and guidance from members through AGM and other engagement at community level. Furthermore the institutional system and framework that has been built over years has been the bedrock of all successes.

PANITA would like to acknowledge all funders and supporters that made all this great work possible. Particularly Irish Aid through, Sustainable Action and Advocacy to Reduce Malnutrition in Tanzania

(AMKA) project. Irish Aid has been the main donor since the inception of PANITA. Also, ASTUTE project funded by UKaid. Others include, Graça Machel Trust (GMT), and SUN Civil Societies Network (CSN). Also the government of Tanzania through Prime Minister's Office, Ministry of Health Community Development, Gender, Elderly and Children (MoHCDGEC), President Office Regional Administration and Local Government (PO-RALG) and Tanzania Food and Nutrition Center (TFNC) and CSOs Members.

Tumaini Mikindo  
**Executive Director**

## IMPLEMENTATION OF THE PANITA STRATEGIC (2015-2020) ACHIEVEMENTS

**Strategic Aim 1: Policy and practice changes that prioritize and increase resource allocation to nutrition at national, local authority and community levels are effectively influenced.**

### **Results 1.1: PANITA Secretariat and members engage in dialogue structures and related advocacy processes for scaling up nutrition at all levels**

PANITA has always engaged with policy makers and government technocrats through different avenues to influence prioritization of nutrition on government strategies, plans and budgets at all levels. Some of the existing and emerging opportunities that PANITA has engaged within 2019 includes: Joint Multisectoral Nutrition Review (JMNR), Nutrition COMPACT review meetings, High Level Steering Committees on Nutrition, Development Partners Group in Nutrition (DPG-N), Parliamentarians Group on Nutrition Food Security and Children Rights meetings, etc. In line with this, PANITA is a member of different coalitions and initiatives such as: CAADP, ESA CSN, JUWAVITA etc. that prioritize nutrition improvement both nationally and globally. On the same note, PANITA engages with all stakeholders basing on the SUN movement principles, where improving working relations with government, development partners and other stakeholders is central to our agenda towards better nutrition outcomes in the country.

#### **1. Identify and capitalize upon existing and emerging influencing opportunities for desired changes**

PANITA through Pooled fund, contributed and participated to the 3rd review of Nutrition Compact between Vice President and Regional Commissioners which was organized by the President's Office Regional Administration and Local Government (PORALG) in Dodoma. The third review of Nutrition Compact aimed at presenting the results of the implementation of Nutrition interventions and indicators of nutrition compact for six months of implementation. During the meeting, PANITA as a SUN Civil Society Alliance in Tanzania gave a keynote statement that focused on the functionality and rationale of Regional and Council Multisectoral Steering Committees on Nutrition. PANITA acknowledged the government efforts to ensure that these meetings are conducted quarterly; however the emphasis was on the quality focusing on the use of the various guidelines and tools developed specifically to guide the entire process of organizing and effective members' participation in the nutrition steering committees at regional and district level. Furthermore, it was requested that Regional Commissioners to ensure those meetings are conducted in accordance to the Terms of Reference for R/CMSCN in order to promote accountability for nutrition in terms of agreed plans and resource mobilization for nutrition.

Nutrition compact has contributed to increased personal accountability and transparency for nutrition activities among Regional and Council leaders & officials towards implementation of National Multisectoral Nutrition Action Plan (NMNAP). Also, disbursement of fund allocated for nutrition from own sources has improved after signing the nutrition compact. For example in 2017/18 the government issued a directive through national budget guideline for all Councils to allocate 1000 TZS per year to each child under five years where a total of TZS 11 Billion was allocated but only 22% was disbursement. While for the FY 2018/19 allocation was around TZS 14 Billion and disbursement was 45%. This increase is hugely contributed by nutrition compact; where Leaders at the local level are taking deliberate measures to ensure that funds for nutrition activities is allocated and disbursed from council own sources as per budget guideline from the ministry of Finance.

PANITA supported the President's Office Regional Administration and Local Government (PORALG) to conduct pre-planning, budgeting, and advocacy sessions on nutrition in all councils in Katavi for FY 2019/20. The purpose was to orient participants on the use of the redesigned PlanRep tool with new nutrition objectives. This activity contributed to the development of quality, high impact, evidence-based Regional and Councils nutrition plans, and budgets for FY 2019/20.

PANITA continued to engage with the Rural Producers' Forum in Tanzania (JUWAVITA) for the purpose of expanding its advocacy space for improved nutrition through producers. In 2019 PANITA participated on the first meeting of the forum which was meant to reflect the launch of the forum, finalization of joint statement as well as discussion on post-launch engagement of the forum. Further to this, PANITA continued to work closely with Tanzania Early Childhood Development Network (TECDEN), MoHCDGEC and other stakeholders in the process of revitalization of National Multi Sectoral ECD in Tanzania. Through this engagement PANITA among other nutrition stakeholders was selected to be part of the Taskforce to develop the National ECD Multisectoral Action Plan as far as the Nurturing care framework is concern.

At sub-national level, PANITA through Lishe Endelevu project supported the government of Tanzania (GOT) to strengthen multi-sectoral coordination for improved nutrition plans and budget within LGAs, including private sector engagement in nutrition interventions. Towards achieving strengthened multi-sectoral coordination with sustainability of these efforts being the major end goal, PANITA conducted Regional level meetings to share lessons learned, challenges, and priorities from all districts council for RC and the RCC (Technical committee chaired by RAS) ownership to all 4 Lishe Endelevu Regions (Dodoma, Morogoro, Iringa and Rukwa). These meetings were used as an advocacy platform to call for increased resources allocation form domestic funds and to prioritize nutrition in all the councils and regions plans. The resolutions were shared to the regional authorities for follow-up and continuity.

PANITA in collaboration with Deloitte under Lishe Endelevu Project conducted a training on NMNAP targets and the revised TOR to Regional and Council Multi-sectoral Steering Committees on Nutrition. The aim was to increase understanding among committee members to facilitate ownership of the nutrition agenda and improvement of budget allocation and improve coordination capacity of RCMSCN for specific and sensitive nutrition interventions. These training were conducted in 22 councils in all Lishe Endelevu regions (Morogoro, Dodoma, Iringa and Rukwa).

### **Develop a good working relationship with Nutrition Focal Points and Nutrition Officers at all levels**

PANITA has always endeavored to forge good working relationship with Nutrition focal points and nutrition officers at Council level. Through ASTUTE project PANITA conducted Joint Review Meeting in five Lake Zone regions (Shinyanga, Mwanza, Geita, Kagera, and Kigoma) involving CSOs, Council Nutritionists and community development officers. These meetings were attended by a total number of 189 participants (Kagera 45, Kigoma 38, Shinyanga 30, Mwanza 48, and Geita 28). The meetings aimed at improving working relationship between CSOs and government officials which is a critical element for effective implementation of nutrition interventions at the council level; and to harmonize the reporting system to the government in accordance to the government new regulations and other prior requirement as prescribed by NMNAP. Through these meetings, CSOs and government officials agreed to work closely together in the implementation of nutrition activities.

Besides, PANITA has been using Council Multisectoral platforms as a part of improving the working relationship with Nutrition officers, for example through AMKA project, PANITA conducted workshops with Council Multisectoral Steering Committees on Nutrition (CMSCN) for Misungwi and Itilima districts IN Mwanza and Simiyu regions respectively. A total of 65 members of the committees and CSOs were oriented on the policy frameworks, strategies and Nutrition COMPACT that govern nutrition services in Tanzania. Also the same committees were oriented on the revised TOR for R/CMNSC to build consensus among key stakeholders engaging in nutrition sector at regional and council level.

Additionally, through AMKA project, PANITA conducted Zonal Review meetings, where 35 CSOs members from Mwanza and Simiyu regions participated in this meeting. The meeting also was attended by RNUO's from respective regions. The objective of the meetings was to share experiences, best practice and challenges from both Members and RNUOs encountered in the implementation of various nutrition interventions in their localities.

*CSO review meeting*

## **2. Develop good working relations with gatekeepers (e.g. media house editors), influencers (e.g. politicians) and decision-makers (e.g. senior government officials) for rewarding policy engagement**

In 2019 PANITA as part of continued improvement in working relationship with government officials at national and sub-national level. PANITA conducted meeting with PORALG to share with PORALG the projects objectives, activities, and outcomes. As results of this engagements, PANITA managed to secure permission to implement various projects to the LGAs and this endeavor gained collaboration from LGA leaders.

PANITA in collaboration with Nutrition International (NI) and World Vision Tanzania conducted meetings with relevant Ministries, Departments and Agencies (MDAs) as well as international organizations such as MoHCDGEC, PORALG, MSD, TFNC and UNICEF respectively for the purpose of ironing out strategies and actions from key nutrition and health stakeholders that will enhance the sustainability of the gains that emanated from ENRICH project in Shinyanga and Singida especially on policy frameworks that governs key nutrition and health activities on Maternal and Child Health. For the purpose of instilling ownership, integration, and execution of project activities within the government plans and budget frameworks.

## **3. Forge strategic partnership with Members of Parliament, particularly the Parliamentary Group on Nutrition Food Security and Children Rights.**

PANITA in collaboration with Agri Thamani conducted a meeting with Members of Parliament on the role of the parliament in nutrition revolution in Tanzania. The target group for seminar was members of parliament, including members from the Parliamentary Group on Nutrition Food Security and Children Rights. The session was chaired by the Deputy Speaker of the National Assembly of Tanzania, Hon. Dr. Tulia Ackson and was also attended by the Former Prime Minister, Hon. Mizengo Peter Pinda. The Members of Parliament were given insights and background on nutrition and the role of the parliament in pushing forward nutrition in Tanzania. The main objective of the seminar was to sensitize members of parliament on key nutrition issues, creating awareness of the nutrition situation in Tanzania to inform and enable members of parliament as key policy decision drivers and makers to carry forward the nutrition agenda in political contexts.

## Results 1.2 Key stakeholders at various levels and the general public are aware of the malnutrition problems

Stakeholders' sensitization and education has been one of key strategies in the quest to improve nutrition status in our communities. In this regard, PANITA has put an emphasis to reach a wide range of stakeholders through: Bilateral meetings, capacity building meetings, Website, newsletter, Social network channel such as twitter, YouTube, Facebook etc.

### 1. Use of diverse communication channels for bringing advocacy messages home

PANITA continued to use multiple channel to deliver information to its CSO Members and General public. During the reporting period PANITA used diverse channel such as its Website, social media networks (Facebook, Twitter, and YouTube) where different information are posted and shared. Also, PANITA produced and printed a total of 5000 Different nutrition education materials and distributed to its members and other interested parties for the purpose of enhancing their understanding on nutrition issues. The circulated materials includes the following: *Maziwa ya Mama pekee yanatosha*, *Jinsi ya kukamua maziwa ya Mama*, *Lishe wakati wa Ujauzito na kunyonyesha*, *Jinsi ya kumlisha Mtoto baada ya miezi 6*, *Jinsi ya kunyonyesha mtoto wako*, World Health Organization Nutrition Targets 2025. Further to this PANITA was able to collect nutrition related information from other stakeholders; from both outside and inside the country and share them to Members. These includes: *Kilimo kama msingi wa kuboresha Lishe*, Nutrition Exchange Newsletters,

Also, PANITA contributed to the development of FEMA-Magazine issue on Nutrition of October – December 2019. PANITA's role in the development of this particular issue was to package the nutrition component to the Magazine, but also suggested the list of key informers on nutrition related articles from national to local level. The magazine is distributed to both secondary schools, Folk Development Colleges, local government and civil society partners across Tanzania; thus enabled to bring nutrition education to a wider and new audience especially adolescent and youth.

### 2. Use of culturally sensitive means and techniques such as theatre groups to package and deliver messages

PANITA through its CSOs members has been raising awareness to the community through various cultural techniques such as the use of theatre groups, songs, and drama for delivering nutrition messages to the community. Civil Societies implementing ASTUTE project used theatre groups, songs and drama through support group to deliver nutrition messages and escalate the understanding of the members of the group and the community on the insisted behavior target by the project: adolescent/maternal and Breastfeeding, complementary feeding, gender, Early Child Development, water sanitation and hygiene.

Through AMKA project, CSO such as AMANI GIRLS HOME and MASS MEDIA BARIADI used theatre groups during the commemoration of Village Health and Nutrition days in Itilima and Misungwi to raise nutrition awareness to mothers/caregivers, fathers, and other people attending the events. A total number of 1544 (female 873, male 271 and 400 children) people were reached through these events.

*School garden Itilima. Photo by Mass Media Bariadi Implementing AMKA project Itilima.*

### **3. Document and make use of success stories for effective behavior change communication**

The success story is the key fundamental compiling the impact and value of PANITA's programs through member's network. Documenting success stories is pivotal that leverages efforts and achievement attained by PANITA members working on community support engagements. Success stories are important because speed up innovation adoption among PANITA members, through the use of up to date technologies to implement cost-effective and high impact nutrition activities in their localities. In 2019 PANITA analyzed and documented 5 success stories from members to enhance learning and accountability among members to increase community consciousness and behavior transformation on nutrition. These success stories shared includes; TAMA shared a success story on Tweyambe support group that focused on male involvement to nutrition activities, TADEPA shared success on homemade "Unga wa Lishe", Mwangaza shared a success story basing on maternal nutrition, MECEG shared on Complimentary feeding that focused on how to prepare nutritious food for children under 2 years, and Humuliza on shared Poultry keeping for nutrition and income generation. These are some of the members from the lake zone region, generally these success stories shared were posted on PANITA website, social media, and through zonal review meetings with the purpose to enhance cross-learning and accountability among members.

### **4. Work with members, key individuals such as community leaders, Village Health Workers for information dissemination.**

In the effort to disseminate information to members and key individuals, PANITA through ASTUTE project which was implemented in 36 councils of the Lake Zone regions (Mwanza, Geita, Shinyanga, Kagera and Kigoma); by using 1,113 behavioral change support groups for nutrition PANITA have reached a total of 296,162 beneficiaries (64,419 males and 234,743 females). Support groups as a means to enhance knowledge and skills on adolescent nutrition, maternal and infants' nutrition,

ECD, WASH and Gender and in collaboration with LGA staff such as Community Development Officers Nutrition Officers and Village Health Workers to ensuring nutrition impacted behavior change at house hold level have contributed to remarkable and observable achievements such as 1) increase number of men who attends Ante Natal and Postnatal Clinic with their wives 2) reduction of workload to pregnant and lactating mothers 3) men honor and participate in breast feeding week 3) Co- parenting has been observed 4) decrease of Gender Based Violence cases in the community 5) some men have been supporting their spouse taking their children to Ante Natal Clinic 6) men honor ways of family planning as used by their spouse(s) and 7) men appreciate child spacing for improved child and mother health and nutrition status. Also CSO members have been worked closely with community leaders and Community Volunteers in organizing and execution of VHND in quarterly basis.

## **Strategic Aim 2: PANITA membership base is broad and members collaborate, learn from one another and network with other stakeholders**

### **Result 2.1 Quality membership services are provided timely**

Strength of PANITA as a network is anchored on its member base; however, it also recognizes capacity variance among its members in delivering nutrition interventions. In this regard the Secretariat has been continuously assessing strength of individual Member and develop and implement capacity building programs to its members basing on the gaps identified.

#### **1. Undertake due diligence screening of members based on explicit membership criteria**

Due diligence screening process focused on organization management structure and programmatic implementation of donor-funded projects and nutrition activities. The process looked at Legal compliance in the establishment of the organization, organization vision, and mission, Presence of functional Board of Directors, strategic plan, financial management system, and Human resource management. However, on the program management side, the assessment included: capacities in the project planning and implementation, technical capacity of employees, existing advocacy initiatives, monitoring, and evaluation as well as organization sustainability strategy.

In this process, PANITA conducted due diligence exercise to 14 CSOs applied for AMKA project call for proposal, in Misungwi DC and Itilima DC. The main objective of this exercise was to assess the CSO's capacity in aspects of governance, program, and financial capacities. Therefore, the accomplishment of this exercise resulted in selecting 2 CSOs with the best proposal as per call for proposal, these CSOs are; Amani Girls Home for Misungwi DC and Mass Media Bariadi for Itilima DC, selected CSOs were notified to implement AMKA Project- Community engagement activities hence the results from this process laid the foundation for capacity building process for the selected CSOs for seamless implementation of AMKA Project in Misungwi and Itilima.

*Photo showing 92 members of Unyonyeshaji group at Ishunju ward - Misenyi District attending Mtoto Mwerevu session. Photo by: KIKUKWE.*

## **Result 2.2 Information on Best practices and success stories of members shared widely and timely**

PANITA is a vast network, with members scattered all over the country; implementing different specific and sensitive nutrition interventions that requires good collaboration mechanisms for its optimal performance. Secretariat has adopted various strategies to ensure Members exchange information and have effective cross-learning among themselves, such as: sharing of experiences and best practices, success stories, and innovations among others.

### **1. Promote cross-learning among members**

In the efforts to strengthening CSOs' coordination and collaboration among themselves and LGAs and expand CSOs' space to influence plans and budget for nutrition activities at the local level; PANITA conducted Zonal review meeting to 35 CSO Members from East Lake Zone, West Lake Zone and Western Zone which comprises Mwanza, Simiyu and Mara; Kagera, Geita and Shinyanga as well as Tabora and Kigoma respectively. Zonal review meetings are fora where PANITA members meet and share experiences and deliberate on challenges for the purpose of improving their capacity to implement nutrition interventions. It is in these meetings where review of members' nutrition activities reports is reviewed, progress on Scaling Up Nutrition are shared at LGA and national levels; and globally. Also to considerations for improvement with of a view capacity building of member's organizations focusing on nutrition and gender, roles of CSOs in the new-revised TOR for R/CMSCN. The key results of these meetings were improved coordination of CSO members, effective sharing of knowledge and best practices in support of implementation of nutrition activities at LGA levels.

## Strategic Aim 3: PANITA members' capacity to deliver quality nutrition programs strengthened

### Result 3.1 PANITA members' technical skills to fulfil their corporate mandate improved

PANITA Secretariat has been constantly assessing member's capacity to identify areas of support and make use of multiple opportunities and avenues to address the gap; for example through zonal review and capacity building meetings, monitoring visits, mapping exercise, due diligence, etc. have been conducted.

#### 1. Develop and roll out user-friendly tools for Monitoring and Evaluation

PANITA has continued to strengthen the Monitoring, Evaluation, Accountability, and Learning (MEAL) system at the subnational level particularly within PANITA network. PANITA in collaboration with IMA world Health through ASTUTE Project, rolled out the Personalized Support Group for Action tool; as part of strengthening CSOs' ability to make support groups more personal and action-oriented on new small, do-able action and assure program quality. This tool was deployed to PANITA members in the lake zone regions (Shinyanga, Geita, Kigoma, Kagera and Mwanza) to strengthen; 1. Monthly meetings between DNuOs and CHW supervisors (who in turn facilitated more effective monthly meetings with CHWs); 2. Home visits, including the use of CHWs dialogue guides to improve negotiation, 3. Positive Deviance\Hearth (PDH); and 4. Support group negotiation. The small do-able action tool has been adopted and incorporated in various PANITA member's programs for example Mwangaza through "Si Kila Homa ni Malaria" project is using small, do-able action tool through community change agents to help community members adopt healthy behaviors and to improve both nutrition and health of women and children. Another CSOs has adopted the tool into their program are; TADEPA on SBCC Malaria, NELICO, and Bukombe district council.

*CSO review meeting*

### **Result 3.2 PANITA members facilitated to develop sound organizational systems, and mobilization resources to deliver quality nutrition interventions**

Organizational sustainability has been one of fundamental pillars of PANITA institutional capacity strengthening for both Secretariat and Members. Thus, throughout lifespan of the current institution strategy PANITA Secretariat has substantively invested in action and processes that either directly contribute or promote ability of mobilizing recourses from multiple sources both in county and globally.

#### **1. Participate in local government planning processes for synergistic and strategic resource use**

PANITA through SUN POOLED FUND Project supported its staff and CSO Members to participate in pre-planning and budgeting meetings which were organized by President's Office Regional Administrative and Local government. These meetings aimed at facilitating councils in designing, planning, and budgeting for nutrition activities with consideration of addressing councils' main nutrition bottlenecks as seen from Bottleneck Analysis report. This year, according to PORALG the main objective of pre-planning and budgeting was to have improved quality, high impact, and evidence-based plans for the financial year 2020/21. A total of 40 CSOs from the Rukwa, Mwanza, Geita, Morogoro, Kagera, Shinyanga, Kigoma and Tanga regions participated in these meetings and submitted their contribution to the council's nutrition plans and budget. For the past few years, the analysis of funding for NMNAP was lacking financial contribution from Nutrition sensitive sectors mostly from CSOs. The participation of CSOs in Planning and budgeting session is going to fill this gap and the financial contribution of CSOs to the implementation of NMNAP is going to be reflected in government systems. PANITA will continue to support and encourage its CSO Members to participate in these fora.

*CSOs Training on TOR for Regional and Council Multispectral Steering Committee on Nutrition*

## Strategic Aim 4: Strengthen the position of PANITA as a nutrition communication hub for members and General Public

### Result 4.1: Dissemination of knowledge among PANITA members improved.

Since its inception, PANITA has always endeavored to provide information to its Members with aim of enhancing their knowledge on nutrition. The information provided have been a corner stone for public education, Members capacity building, and advocacy initiatives at different levels. This has been achieved through multiple ways including: its website, brochures, leaflets and media at large.

### Result 4.2: Functional communication interface with PANITA members maintained.

One of the key elements of cohesive organizational network is the existence of institutional framework and structure that allow two ways communication between secretariat and Members. In cognizant of this requirement PANITA has developed and maintained different communication channels such as: Website, website, brochures, leaflets and media at large.

#### 1. PANITA engage with different communication channels such as Website, Facebook, YouTube and having PANITA website linked to the social media

PANITA continued to maintain and update its website [www.panita.or.tz](http://www.panita.or.tz) as a tool to share key nutrition information to its members and the general public; PANITA's key documents, as well as Members information such as success stories and good practices. As result of this, we have observed a notable increase on the website page hits the duration of the reporting period from 116,867, hits by April 2018 to 153,862 hits December 2019. This is attained through various means including its Social media accounts i.e. Facebook and Twitter; where PANITA has constantly posted nutrition information into those accounts. During the reporting period PANITA has posted a total of 103 different Key nutrition messages, videos, info-graphics, National and International survey as well as key PANITA updates.

*Village Health and Nutrition Day in Itilima 2019*

### **Result 4.3: Working relationship with media enhanced**

One of the functions of PANITA is to provide information on nutrition as part of educational campaign to its Members and general public thus PANITA has endeavoured to build long-term relationship with different media house and Journalists as means to reach broader audience in a cost effective manner.

#### **1. Maintain long term relationship with media houses and journalists**

PANITA in efforts to enhance media relations and strengthen its position as a communication hub as well as creating a wider reach of the general public, in the year 2019 collaborated with the following media houses; East Africa Radio, Mlimani Radio, Capital Radio & TV, and Inter-news Tanzania in educating the public and creating awareness. The reach was through radio interviews some of which were coupled with live video airing and short recordings that could also be shared through social media. These sessions centered on nutrition, mainly providing knowledge to the general public on basic and day-to-day nutrition issues. The major goal is to change behaviors, particularly lifestyle behaviors. However, these sessions aimed at creating awareness primarily, towards an increase of knowledge, a change in attitudes and perceptions, and finally adoption of good nutrition practices for better health and well-being of communities.

## **Strategic Aim 5: Organizational Development and Sustainability of PANITA strengthened.**

### **Result 5.1: Human resource capacity strengthened**

Organizational ability to efficiently and effectively achieve its intended target, among other things depend on the quality of employees both in terms of technical capacity and their human attributes. Recognizing this aspect, PANITA has put in place systems and mechanism to ensure its determined adequate number of staff as well as hiring and maintained for sufficiently period of time as needed.

#### **1. Hire and maintain highly competent optimal number of staff for quality program delivery**

PANITA management continued to strengthen capacity of its secretariat staff in order to improve work performance as well as to cope with expanded program activities. Apart from in-house capacity building, number of PANITA staff have attended long courses at post-graduate level. Specifically, two secretariat staff have completed their studies on Master's in Community Health and Project Management; and other two staff are undertaking Master's in Public Health. This is part of long-term institutional strengthening program as visualized in strategic plan 2015 - 2020.

### **Result 5.2: Governance and Management of PANITA strengthened.**

Governance is the heart of organizational performance in terms of achieving objectives as well as building credibility to handle and manage resources that are required during activities implementation. PANITA organizational structures has provided organs that have been bestowed with function to oversee governance and accountability. This includes Members Annual General Meeting and Board of Directors.

Also, it has developed policies and regulations that govern day to day handling institutional resources on day to day basis.

PANITA secretariat has continued to provide both technical, material and financial support for the smooth running of Board of Directors activity for the reporting period. This has allowed the Board of Directors to effectively dispense its mandate such as perform its fiduciary functions, guidance and support to the secretariat and network at large.

### **Result 5.3: Quality Assurance, M & E system established and operationalized.**

Quality and standard remain one of PANITA core values, where a Secretariat and Members have always strived to uphold and maintain throughout PANITA life span. Since its inception, PANITA has developed various documents and tools that aim to promote quality of all implemented activities as well as management and governance systems. These ranges from policies, regulations, SOPs and data collection tools. PANITA also developed and operationalized the robust M&E system that has been implemented collectively by Secretariat and Members at large. The wealthy of information collected through these systems has been critical condiment in the learning and reflection among ourselves; thus, has been important element in the quest to up hold and maintain the quality of our work throughout the five years of the current strategy

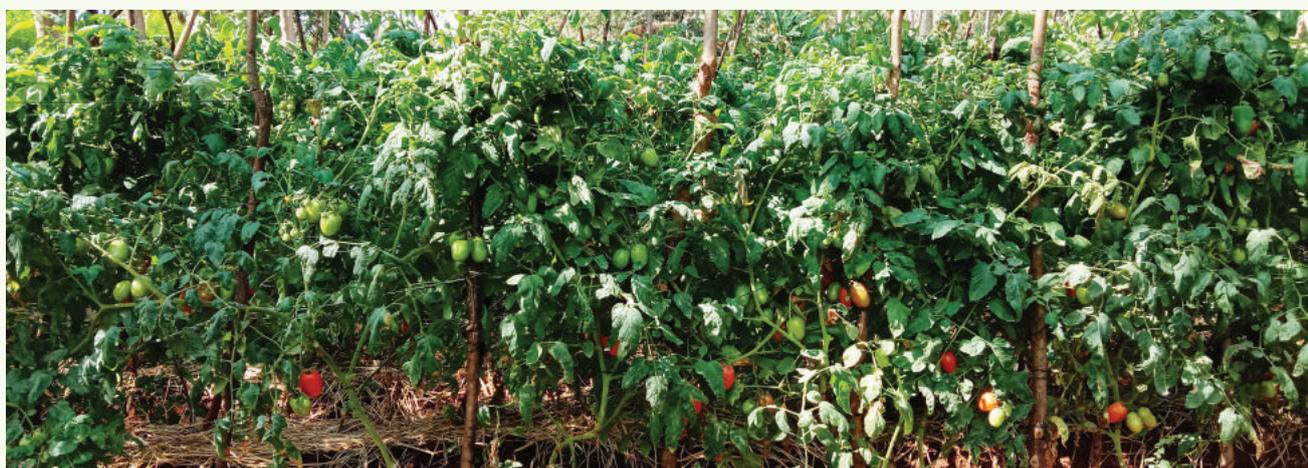

*The Importance of a Colourful Diet*

PANITA as part of its initiatives to strengthen the platform has continued to support zonal coordination system to engage with its members across Tanzania. Through PANITA window, Zonal coordinators have been well equipped in terms of leadership skills, facilitation skills and advocacy skills hence act as a catalyst that foster engagements in the community in pushing nutrition agenda in their specific zones. PANITA zonal coordination system so far has brought achievements throughout the zones due to effective cooperation, collaboration among government officials, secretariate and civil society network (CSN) at the regional and council levels.

Through Zonal coordinators, PANITA continued to provide a smooth learning environment to their members across all zones; whereby members share knowledge, exchange experiences and cross learning from one another. Zonal coordinators actively participated in the preparations of various trainings including members engaging in Council Multi-sectoral Steering Committees (CMSCN) for the purpose of advancing their active participation in the steering committees and understanding their responsibilities on revised TOR for the National Multi-sectoral Nutrition Action Plan (NMNAP). As a result of this initiatives, PANITA has observed an increase in number of Council multi-sectoral steering committees (CMSCN) reports from the members across the zones. This entails that there is a great effort played by zonal coordinators in encouraging members to ensure that CSO Members participate in those meetings both at regional and councils levels.

On the other hand, Zonal coordinators participated effectively in the updating Member's information system (Database) across all the zones. PANITA member's database provides all the necessary information of each member across all the zones. Through Updating process of the members database it's ensures obtaining correct and reliable information of the member existence each year.

PANITA appreciates effort made by the Zonal coordinators across the zones in ensuring there is a good coordination, cooperation and collaboration among Government officials, Secretariat and CSO Members.

Apart from recording good progress in year 2019, it has also been useful period in terms of challenges and lesson learning for PANITA, which includes but not limited to:

### Challenges

1. Low awareness and understanding of the public on basic nutrition facts, and most of them think nutrition is about having food on the plate.
2. There has been substantive effort by the government and other stakeholders to raise resources for nutrition from domestic and other external sources; however, the nutrition sector has not been sufficiently resourced to achieve the set goals.
3. Inadequate resources to support PANITA's core activities as well as member's engagement, particularly at local level.
4. General public have not easily articulated the long-term effect of malnutrition that develops in early childhood phase to the negative consequences both socially and economically, to both individual and the nation at large; thus, nutrition is not see as a priority.

### Lessons

- i. Bilateral advocacy meeting with regional administration a is a very key instrument in bringing accountability for Nutrition activities at the sub-national level, in order to have the common ground and joint efforts in fighting Malnutrition. However, this initiative requires additional resources given the current fund constraints.
- ii. Multi-stakeholder's forum is critical for coordination and collaboration; effective planning, budgeting and implementation of the nutrition actions at all levels in a more harmonized and sustainable manner.
- iii. Improved linkages between CSOs with government institutions and other key stakeholders is absolutely critical for optimal performance of CSOs.
- iv. A knowledge gap exists among technocrats as well as politicians at the local level on the link between malnutrition and poor economic and development outcomes. This has been revealed through our engagements with local authorities. This will continue to be PANITA's focus as we move along in the implementation trajectory of our five years strategic plan.

Chairperson.

# 5 CONCLUSION

Generally PANITA has substantially accomplished planned activities for 2018 as guided by Strategic plan 2015/2020. This has been possible as a results of dedicated, industrious, and competent Secretariat staff augmented by committed leadership by the BOD and good collaboration and guidance from Members through AGM and other engagement at community level. Furthermore the institutional system and framework that has been built over years has been the bedrock of all successes.

PANITA would like to acknowledge all funders and supporters that made all this great work possible. Particularly Irish Aid, through Reducing Malnutrition through Advocacy and Coordination (ReMAC II) project. Irish has been the main donor since the inception of PANITA. Also, ASTUTE project funded by UKaid. Others include, Graça Machel Trust (GMT), UNICEF and SUN Civil Societies Network (CSN). Also the government of Tanzania through Prime Minister's Office, Ministry of Health Community Development, Gender, Elderly and Children, President Office Regional Administration and Local Government and Tanzania Food and Nutrition Center and CSOs Members.

*CSOs Communication and nutrition Message Training*

**1. WESTERN ZONE****Regions:** Kigoma and Tabora**Zonal Coordinating CSO:** Umoja wa Wawezeshaji - KIOO**Zonal Coordinator:** Edward B. Simon**Advocacy at District and Regional level**

Zonal Coordinator participated and collaborated with other CSOs in the western zone who are proactive members in Council and Regional Committees R/CMSCN including other platforms. These entities were created by the government to decentralize government power to the district level, CSOs play a significant role in advocating for nutrition activities through the increased allocation of nutrition funds as per under five at the council level. During this reporting time, zonal coordinator managed to collect 10 CMSCN reports from Tabora and Kigoma PANITA members.

*Community Support Group - Photo by KIOO*

### Engagement with members:

Integrating member's nutrition activities into Comprehensive high impact nutrition activities by having a solid member's strategic base in Tabora and Kigoma. The zonal coordinator continued to capacitate PANITA members through physical and visually follow up to see CSOs nutrition activities implementation at their localities. In 2019 zonal coordinator in the western zone managed to collect 23 nutrition activities and CMSCN reports.

## 2. CENTRAL ZONE

**Regions:** Dodoma, Singida, and Manyara

**Zonal Coordinating CSO:** NGO's Network for Dodoma (NGONEDO)

**Zonal Coordinator:** Edward Mbogo

### Advocacy at District and Regional level

NGONEDO as a coordinating CSOs in the central zone participated and coordinated CSOs members in R/MSCN and also visited DNuOs in Dodoma MC, Bahi DC, and Chamwino DC, the excise aimed at identify nutrition challenges and solutions within each Council and harmonizing CSOs interventions to be included on district plans and MTEF. NGONEDO in 2019 managed to collect 8 CMSCN reports from central zone members.

### Engagement with members:

Nutrition activity reports from members are key reports that inform the PANITA secretariat on different nutrition interventions implemented by PANITA members throughout the year. During the reporting year, 2019 NGONEDO managed to collect 20 nutrition activity reports from CSOs in the central zone that were submitted and documented by the secretariat.

## 3. WEST LAKE ZONE

**Regions:** Shinyanga, Kagera, and Geita

**Zonal Coordinating CSO:** HUHESO Foundation

**Zonal Coordinator:** Juma Mwesigwa

### Advocacy at District and Regional level

HUHESO facilitated and collaborated with CSOs members in conducting multi-sectoral nutrition advocacy at the council level, in line with NMNAP and government guidelines. CSOs have the potential power a strong voice in advocating for nutrition as a requisite for national development. However, HUHESO collected 18 CMSCN reports that have vast information from key department contributions, challenges, and solutions.

## Engagement with members

Zonal Coordinator conducted physical and phone communication to 29 CSOs in Kagera, Geita, and Shinyanga to provide support and backstopping to members particularly on the nutrition activity reports through that exercise 15 Nutrition activity reports were collected and submitted to PANITA secretariat.

## 4. EAST LAKE ZONE

**Regions:** Mara, Mwanza, Simiyu

**Zonal Coordinating CSO:** Mass Media Bariadi (MMB)

**Zonal Coordinator:** Frank Kasamwa

### Advocacy at District and Regional level

PANITA through CSOs has the mandate to strengthen district coordination of nutrition work across sectors through Multi-Sectoral coordination committees for nutrition. Mass Media Bariadi mobilized members participating in R/CMSCN meetings to effectively track, collect information and contributions from key sectoral departments and nutrition stakeholders in 23 councils Mwanza, Mara, and Simiyu, to identify achievements, bottlenecks, and gaps that will enhance the preparation of advocacy messages to the regions and help to raise the nutrition profile in East Lake zone regions as part of PANITA's efforts to advanced advocacy for nutrition to see that it is being prioritized in government plans and budgets. Also to raise nutrition awareness to key Council Multisectoral Steering Committees on Nutrition (CMSCN) on nutrition especially on District nutrition status and effects of malnutrition on health and the economic development of the nation. In 2019 PANITA secretariat received 12 CSOs reports on the council Multisectoral steering committee on nutrition.

## Engagement with members

Mass Media Bariadi (MMB) continued to facilitate, visit members and encourage all PANITA members to participate in different workshops organized by the PANITA secretariat to promote cross-learning and capacity building on gender and nutrition, good governance, government budget circle, and nutrition activity reports. During this reporting period, 35 out of 54 CSOs shared their reports that shows their experiences, achievement, and challenges on the course of implementation. Through these reports, PANITA was able to extract documents of various success stories and best practices from member reports.

## 5. SOUTHERN ZONE

**Regions:** Lindi and Mtwara

**Zone Coordinating CSO:** Kikundi Mwavuli Mtwara (KIMWAM)

**Zonal Coordinator:** Fidea Amon Ruanda

## Advocacy at District and Regional level

Zonal coordinator in the year 2019, continued to strengthen the working relationship between CSOs and LGA through collaboration and engagement with the government particularly by participating in R/CMSCN to expand CSOs space to influence plans and budget for nutrition activities at the local level and increase inclusion of CSOs activities in the councils MTEF. KIMWAM as a coordinating CSOs in Mtwara and Lindi regions, in this reporting period, coordinated and organized CSOs members in the Multisectoral committee to participate fully, contribute, and provide feedback to other CSOs as a result 10 CSOs reports on CMSCN were collected and submitted to PANITA secretariat.

## Engagement with members.

Member engagement has been one of the effective and efficient activities in keeping the southern zone PANITA membership base thriving and growing throughout lifecycle member's nutrition activity implementation. This was achieved through cross-learning, sharing of success stories, and innovation that has enhanced CSOs program design, planning, and cost-effective implementation strategies towards the reduction of malnutrition. This also complements government initiatives in the nutrition sector. Therefore, in 2019 PANITA Secretariat through KIMWAM collected 20 nutrition activity reports from the southern zone.

## 6. EASTERN ZONE

**Regions:** Dar es Salaam, Morogoro and Pwani

**Zonal Coordinating CSO:** The Centre for Counselling, Food and Nutrition (CECOFON)

**Zonal Coordinator:** Gaudensia Donati

## Advocacy at District and Regional level

Creating an internal space for CSOs to track make follow ups and share this information from Multisectoral steering committee on nutrition stimulate good governance among CSOs and government for effective engagement on CMSCN. It also advances advocacy work for increased prioritization for nutrition intervention at council level. In the year 2019 PANITA was able to collect and document 7 CSOs reports on CMSCN from Pwani and Morogoro regions.

*Regional Nutrition Compact Evaluation Meeting - Morogoro*

## Engagement with members

During the reporting period, PANITA Secretariat conducted zonal review and capacity building meeting to orient CSOs on TOR, NMNAP, Nutrition Compact and government circle for the purpose of strengthening CSOs coordination and their roles in the Councils Steering Committee on Nutrition understand planning and budget processes, stages on how best they can influence each stage of the budget cycle towards more and better spending on nutrition for them to contribute and share their budget to be included in the councils MTEF. The meeting was held in Dar es salaam whereas CSOs submitted to PANITA Secretariat 15 nutrition activity reports.

## 7. NORTHERN ZONE

**Regions:** Arusha, Kilimanjaro and Tanga

**Zone Coordinating CSO:** Arusha Non-Government Network (ANGONET)

**Zonal Coordinator:** Peter Bayo

### Advocacy at District and Regional level

CSOs in northern has played a significance roles in strengthening nutrition advocacy and building an enabling environment to increase prioritization of resources for Nutrition activities at the district level. CSOs has participated in plan and budgeting in Meru DC, Arusha City, Arusha DC, Karatu, Rombo DC, Hai DC, and Monduli DC and follow up on timely disbursement of nutrition budgets according to the minimal mandatory requirement. This has led to the good working relationship and inclusion of CSOs activities in the councils MTEF.

### Engagement with member

ANGONET Continued with coordination and engagement with members in northern zone through one on one member visits and conducting follow-ups to members via phone communication. The main activities performed are; Capacity building and awareness creation on nutrition sensitive agriculture to 9 CSOs in Arusha and Kilimanjaro, facilitating and supporting members to comply with NGOs governing Laws *miscellaneous amendment No. 3 of 2019* because this is a prerequisite also of being PANITA member through this process 33 CSOs have complied. However, data collection process on nutrition activity reports and R/CMSCN from northern zone submitted and documented by the secretariat.

## 8. SOUTH WESTERN HIGHLAND ZONE

**Regions:** Mbeya, Songwe, Rukwa and Katavi

**Zonal Coordinating CSO:** Community Economic Empowerment and Legal Services (CEELS)

**Zonal Coordinator:** Daniel Mtwewe

### Advocacy at District Level

During the reporting period, CEELS has been actively and effectively participating and coordinating CSOs in R/CMSCN PANITA members by convening meetings for Members before and after meetings.

CEELS and other members of R/CMSCN continued to be proactive members in the district and regional committees, including council steering committees and also planning, and budgeting sessions, and other platforms that advance nutrition as per the NMNAP their participation adds value by strengthening community-based activities to fight malnutrition and advocate for increased allocation of nutrition funds from their own sources. Therefore, CSOs members provide/ share theirs in opinions regarding nutrition to be presented in respective meetings and after the meeting CEELS gives feedback to members for collective understating and actions. In 2019, 20 reports from CSOs on nutrition activity reports and nutrition committee were collected and documented.

### Engagement with members

In 2019 CEES managed to visit 25 Members for learning and providing supportive supervision as a backstopping mechanism to the zonal coordinator as well as members on the implementation of nutrition interventions and make follow up on involvement of PANITA members on regional/ council Multisectoral steering committee on Nutrition (R/CMSCN). Nevertheless, CEELS managed to track and use skills and knowledge gained during the planning and budget cycles to explore the potentials of PANITA Members implementing various programs at the subnational level and oriented CSOs on a good working relationship with the government by making sure that their activities are incorporated in the councils MTEF. However, as a result of one CSOs managed to slot in nutrition intervention fund worth 30 million Tanzanian Shillings of which is targeted to enhance adolescents' nutrition in Kyela DC and Mbarali DC.

## 9. SOUTH HIGHLAND ZONE

**Regions:** Iringa, Njombe and Ruvuma

**Zonal Coordinating CSO:** Afya Women Group

**Zonal Coordinator:** Thabit Msofe

### Advocacy at District Level

Afya Women Group in collaboration with CSOs members continued participating in multi-sectoral nutrition committee at the council level, in line with NMNAP and government guidelines with the purpose of advocating prioritization and increase of nutrition resources of high impact nutrition intervention. CSOs have the potential power a strong voice in advocating for nutrition as a requisite for national development. However, from South highland zone PANITA secretariat received 9 CMSCN reports that have vast information from key department contributions, challenges, and solutions which will guide the secretariat to make informed decision.

### Engagement with members

Zonal Coordinator conducted physical via phone communication to 15 CSOs in Iringa, Njombe, and Ruvuma to provide support and backstopping to members particularly on the nutrition activities that was carried out in the reporting period as the result 10 CSOs reports were collected and submitted to PANITA secretariat.
